A photograph of a man dressed as Santa Claus, wearing a red suit and a white beard, performing a dabbing motion. He is holding a large, red, textured stamp with a scalloped edge. The stamp features the word "PATENTED" repeated four times in a circular pattern, with five stars above each instance of the word. The background is a plain, light-colored wall.

F*ck off Kyro

**Ok that last part didn't actually happen...
But here's what DID happen.**

Applying Design Thinking to Fish Keeping

made me a more
Empathetic & Scientific
Designer

Made me
a more thoughtful, patient
human being

It taught me that
**Problems in seemingly unrelated domains
can teach us a lot about UX & HCD**

Most
Importantly

Human & Animal Suffering

Humanity

Language

Language

Internal Dialogue?

Words transform our perception of reality.

Affirmations?

I am Complete

I Improve every moment

I am Creative

I am Content

I am Enough

This moment is Enough

This moment is Blessed

I am Blessed

I am Lucky

I am Gratitude

I am Excellence

I am Peace

I am Tranquility

I made the best decisions at the time

I am Kind to myself

**Language is a profound
phenomenon and not just a
means of communication**

**These are phrases that aren't
vocalised very often,
but shape my world, every day.**

**Words have
shaped Civilisations**

**“Cultures are virtual realities
made of language.”**

Terence McKenna

The right combination of words,
spoken at the right moment,
with the right tone,
to the right audience,
have many times
changed the course of history.

“Without language, one cannot talk to people and understand them; one cannot share their hopes and aspirations, grasp their history, appreciate their poetry, or savour their songs.”

Nelson Mandela

**“If the world is made of language,
then you can hack it in the sense
that you can hack code.”**

Terence McKenna

Every key cultural or technological epoch has given us new language to describe the world and these new paradigms.

What if we could use the
Language of Ecology & Biology
to talk about Design

As an example

Design ~~Cybersecurity~~
Habitats

Systems

- Fixed
- Systematic
- Process
- Order
- Structure
- Organisation

Habitats

- Dynamic
- Living
- Interconnected
- Balance
- Evolution
- Natural Selection
- Organisms
- Organisation

Both are fairly similar

One makes us
think different™

**It has different
undertones & peripheral structures**

Atlassian Design System Analytics

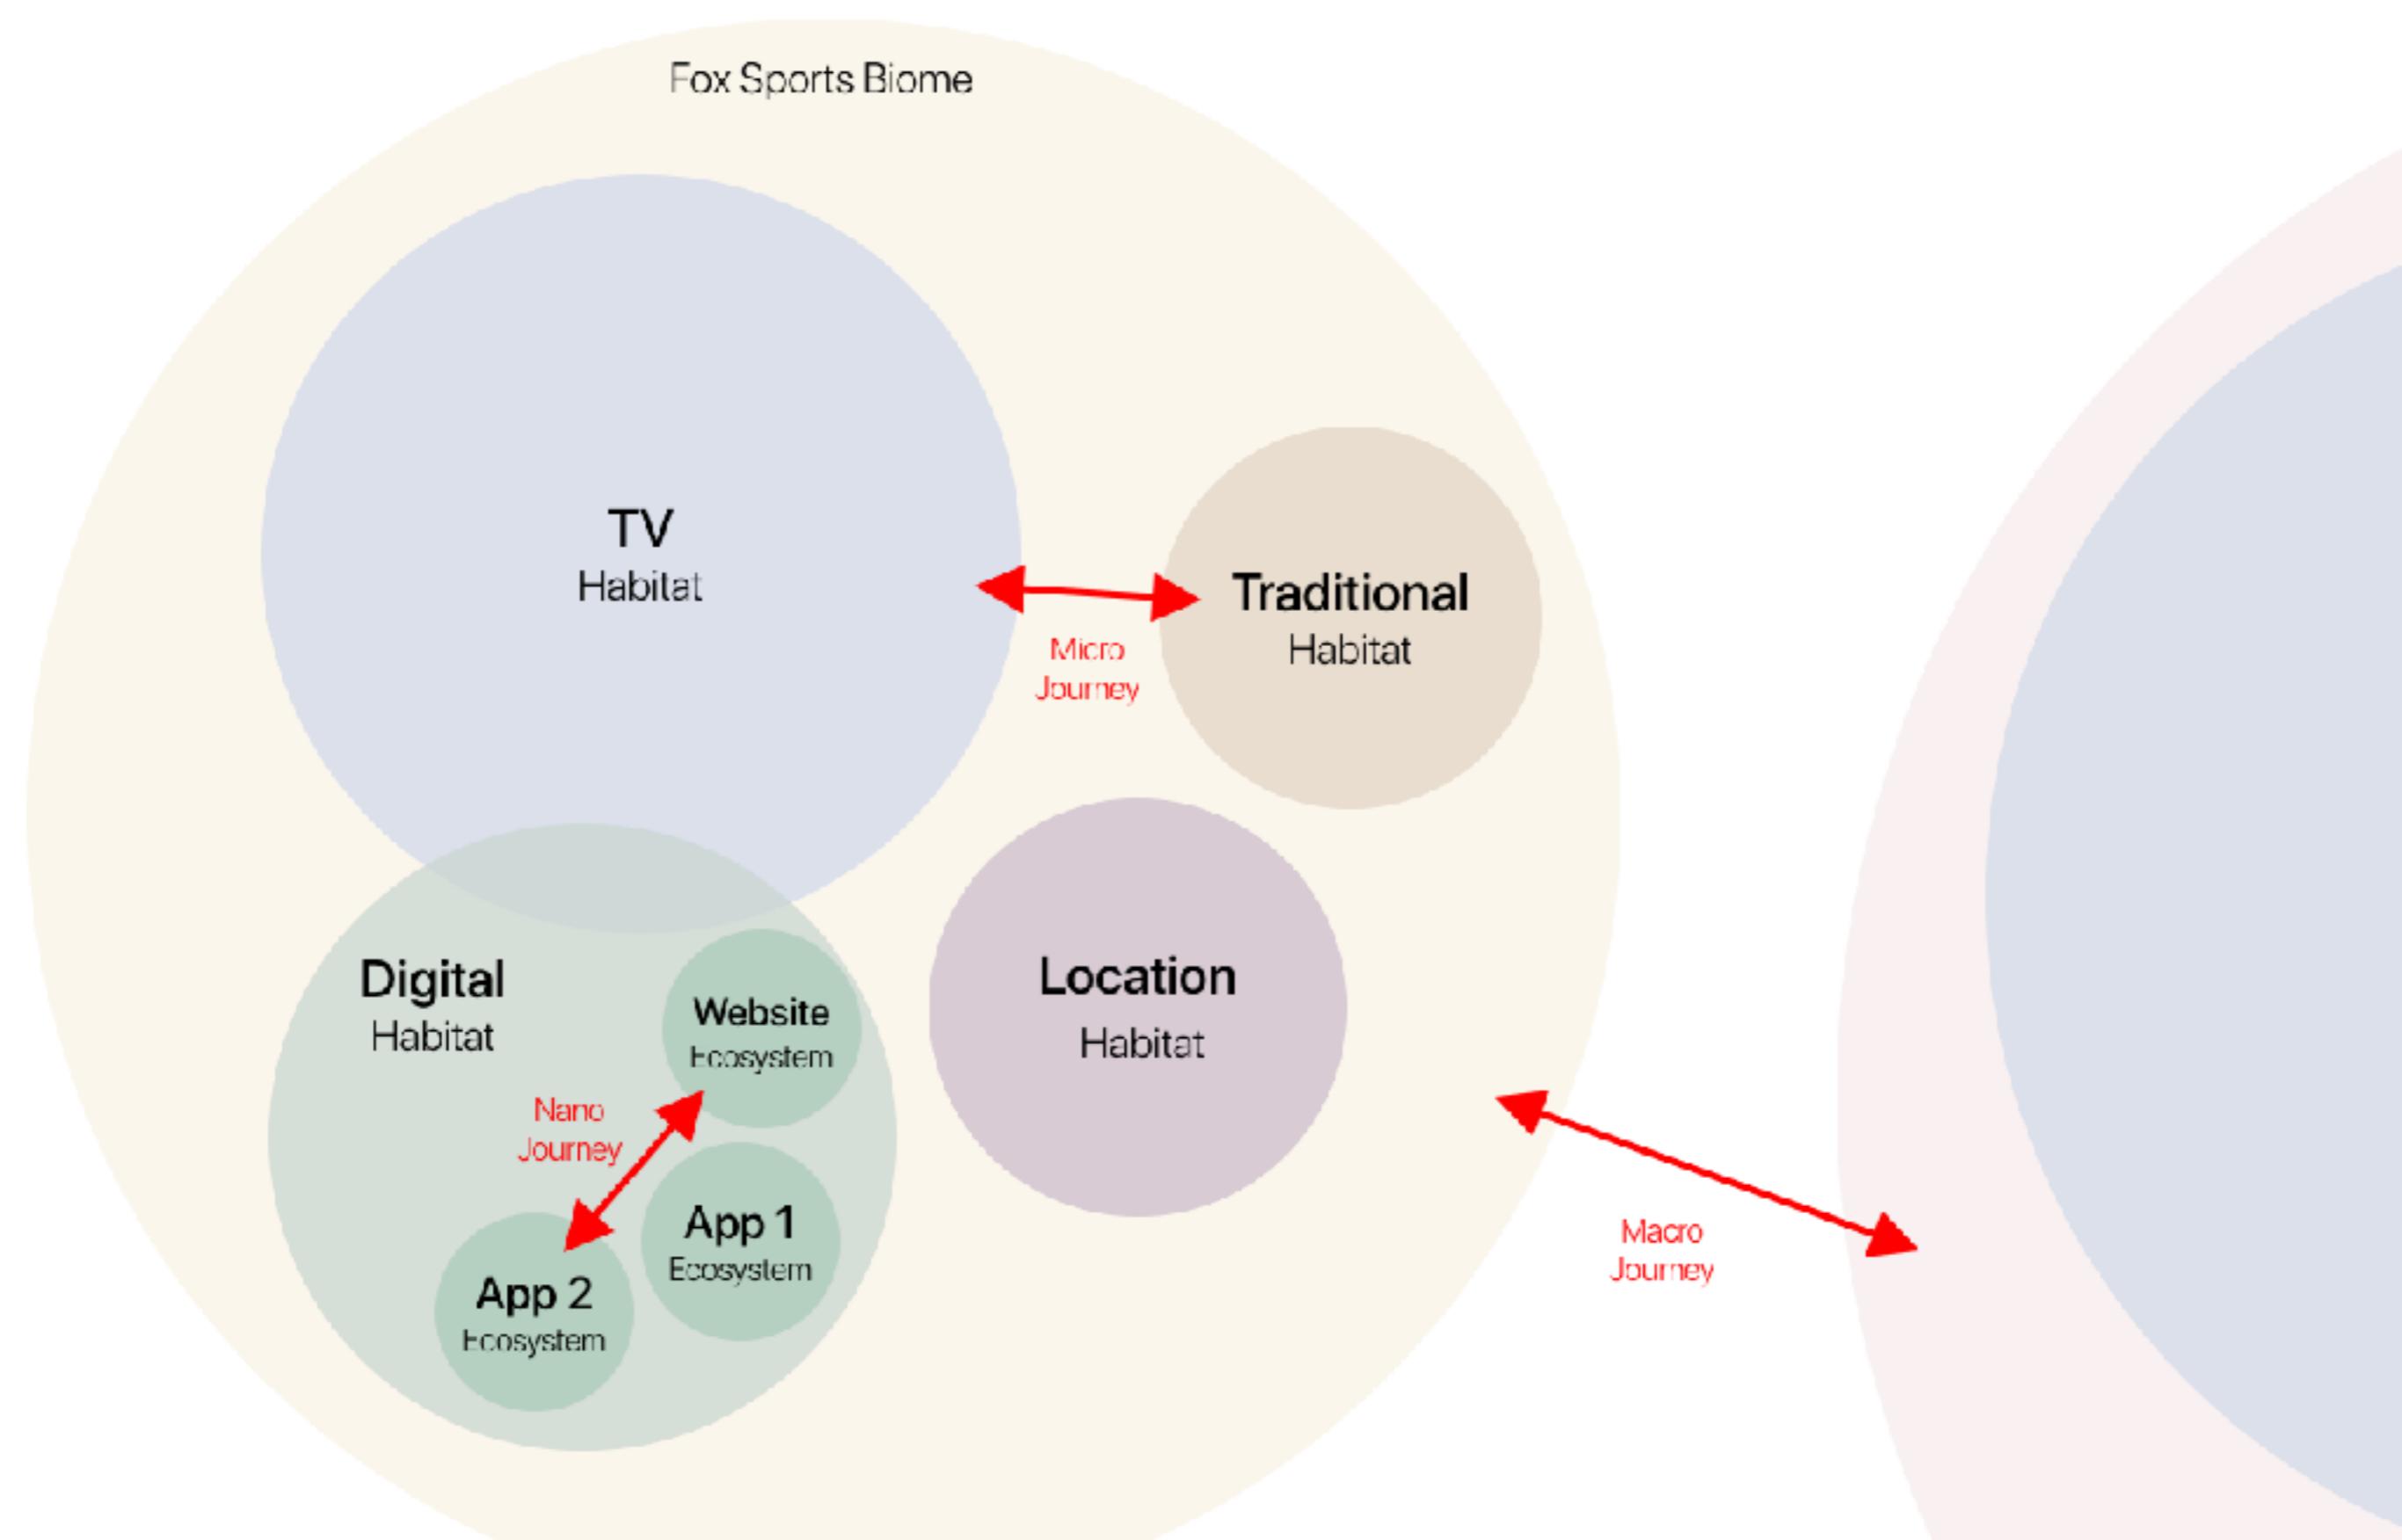

- Natural Selection
- Mutation
- Evolution

Nature is the ultimate
User Testing
mechanism

Cycles/Periods

Mutation?

Natural Selection

This isn't a how to guide

**it's an invitation to
start a conversation
about language.**

**“We can move no faster
than the evolution
of our language”**

Terence McKenna

We need better
language to help us
design the world of the
future with intent.

Before we can begin to intelligently imagine the future, we must first learn how to speak about the future.

Words that efficiently
convey clues as to
HOW we should design.

We all need to contribute to language with more intent and thoughtfulness.

We need to form
linguistic panoramas
that inspire and
empower people.

**From personas to
Persons.**

**From conscientiousness to
Consciousness.**

**From word-smithing to
word-Engineering.**

I believe that the most effective way to change the world, is through language.

Words don't merely
describe things;

They form the
glasses,
microscopes,
binoculars and
telescopes by which we
perceive reality.

They allow us to
Zoom OUT
from humans and into
the wider living
machine that is our
planet.

They allow us to
Zoom IN
and address the needs
of individual persons,
not just personas.

On that note...

**Humane
Centred
Design**

Humane-Centred Design

**Not who we design for (Humans),
but HOW we design and how it impacts every
being and ecological system around us.**

Humane-Centred Design

“**Humane** centred design” as a new term forecasts that these issues will be an even bigger crisis in the future:

- Privacy
- Immigration
- Homelessness
- Mental Health
- Animal Welfare
- ...

Humane-Centred Design

It equips us with a kind of language-set to address these issues from a place of humanity, ethics, philosophy & harm reduction.

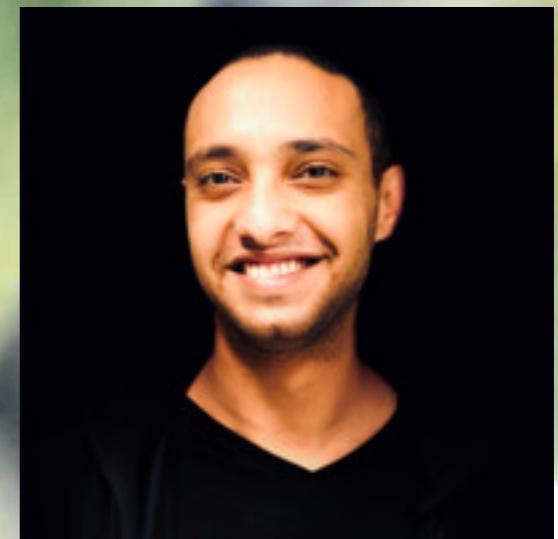

Design empowers us to
improve the World,

Language empowers us
to improve Design.

Thank you!
